

REMARKS1. Amendments to the Claims

Applicants have amended the claims to more clearly define the invention. Specifically, claims 80, 81, 108, 109, 116, and 117 have been amended to more clearly state that the first flexure region is disposed between the mount and one of the pair of spaced-apart braces and the second flexure region is disposed between the mount one of the pair of spaced-apart braces disposed opposite to the first flexure arm. None of the amendments to the claims were necessitated to overcome any prior art and no new matter has been introduced by these amendments.

Applicants respectfully request that the present amendment be entered and the application proceeds to issuance in due course incorporating the present amendment.
